Promotional Marketing Strategies a Click Away With PromoMart's IDEA Store
BUSINESS WIRE

September 17, 1999

JOURNAL CODE: WBWE LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 382

LANGHORNE, Pa.--(BUSINESS WIRE)--Sept. 17, 1999--Devising a great promotional plan, which sparks interest in a company or motivates a workforce, remains a constant challenge for companies nationwide.

Now with PromoMart's IDEA Store (www.promomart.com) great promotional ideas are just a click away.

Every day, the IDEA Store provides case histories that describe successful promotions, which implement the use of advertising specialty products, targeted toward more than 30 different industries. These tested, surefire promotional plans have been proven to increase awareness and business, as well as motivate employees and stimulate customer interest.

The IDEA Store presents different case histories describing various promotional plans, each day, from successful companies across the country.

Individuals can click on the type of industry they wish to target (ranging from advertising and marketing to automotive or agriculture, just to name a few) with an upcoming promotion and find the summary of a successful promotion run by another company targeting the same audience.

In addition, the summary will display the types of products used, the method of applying the promotion and background information on why that particular promotion was chosen.

Regardless, whether a company finds the idea that will make their upcoming promotion a success when they check out the IDEA Store the first time, it doesn't matter. New case histories are posted daily, which target businesses in industries they are looking to impact.

Even if people are too busy to read all of the great ideas now, the IDEA Store remains a tremendous resource. Anyone interested in marketing or promotions should print out each day's promotional ideas and store them in a binder, that way they don't miss a single innovative idea. One never knows when a great promotional idea might place their company in the spotlight.

PromoMart (www.promomart.com), the Internet's largest online superstore of promotional products, offers access to thousands of great products 24-hours a day. PromoMart is designed and maintained by ASInternet, a division of The Advertising Specialty Institute, the information center of the promotional products industry.

PromoMart.com Inventory Doubles in Size

PR NEWSWIRE

January 20, 1999

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 511

LANGHORNE, Pa., Jan. 20 /PRNewswire/ -- PromoMart.com (www.promomart.com), the most comprehensive source of imprinted business gifts on the Web, has expanded its search capabilities to include more than 55,000 products. The new search is now entirely product-driven, instead of catalog-driven, which makes it easier for buyers to conduct a detailed search.

"The first Monday morning our new search debuted, it generated the same amount of orders and information requests as the entire day the last Monday," said Stephanie Schaeffer, vice president of PromoMart.com. "Our hit count is over 2 million per month and growing steadily. PromoMart.com consultants currently do between \$10,000 and \$20,000 of online business each week and now the new product search will make it more convenient to purchase products online."

The new PromoMart.com search benefits companies that range in size from small, local businesses to Fortune 500 companies. Companies have found PromoMart.com to be a source of business gifts that act as a unique, lasting reminder of the company's name or message. "We have found the PromoMart.com Web site an invaluable tool for searching for both specific products and for premium ideas," says Hal Levin, senior vice president of marketing for L.A. Weight Loss Centers Inc. "In fact, we used PromoMart.com as a source of premiums and incentives for our last sales conference. The salespeople were overwhelmed with the gifts and the conference was a huge success."

The appearance and format of the product search is the same, but PromoMart.com's online catalog now contains more than 55,000 products that can all be imprinted with a company's name and message. Users can still search by product category, price range and delivery time, but now search results come up much faster and the shopping cart feature has been modified to streamline the ordering process. A keyword search option allows users to refine their search to include more detailed terms that appear in the product summary. For example, a user searching for a denim baseball hat can select the caps & hat category, and then select denim as the keyword and narrow the search to include only those manufacturers that carry denim hats.

Search results now load quicker and users don't have to scroll down to view product photos and pricing information. The PromoMart.com site continues to offer users the same benefits such as entire Web catalogs of their favorite product lines and links to promotional products, experts that specialize in promotion planning who can offer product suggestions and advice. These consultants are indexed by area code, so users can find someone local to help them through the ordering process.

Users who want to place an order directly through PromoMart.com benefit from PromoMart.com's secure server. This server uses the latest encryption technology to ensure that all sensitive information is transmitted virtually risk-free.

PromoMart.com is designed and maintained by ASInternet, a division of The Advertising Specialty Institute, the business information center of the promotional products industry and Millstar Electronic Publishing Group.

GERMANY: IN-STORE ADVERTISING COLUMNS

Lebensmittel Zeitung (LZ) 14 Aug 1998 p.50

Language: GERMAN

Big Point Werbung & Marketing GmbH, Munich, not only markets illuminated, rotatable classic advertising columns but also the newly developed digital Big Point advertising column. The company specialising in advertising, marketing, franchising and trade consulting focuses on a new form of in-store advertising and is aiming to achieve market leadership by increasing their currently 500 sites to 1000 sites in Germany by the year 2000. Via modem and internet, print messages or company logos displayed on the digital column can be edited by retailers and **brand** manufacturers. Large advertising columns presented **products** in entrance areas of at least 1,000 square metre consumer stores of the Spar AG. According to four Munich Spar stores, during a one week test turnover of the advertised products increased on average by 20%.

Dramatic new era of packaging

AUSTRALIA: NEW PACKAGING CHALLENGES

Foodweek & Liquor Week (XBS) 28 Apr 1998 P.8

Language: ENGLISH

The Packaging Council of Australia observed that the budding on-line home shopping will usher brand owners and packaging manufacturers into a new era of minimalist and functional product packaging. According to a survey conducted by Coopers & Lybrand, about 15% of retailers in Australia had already offered home shopping on the Internet. It is estimated that the proportion would increase to 75% in 18 months in the light Australia has the highest penetration of the Internet per capita in the world. On the other hand, revenues from the internet are at about 2% of sales. However, it is expected to grow at a compound rate of 100% annually to 20% of sales in 5 years. The Packaging Council of Australia urged the packing industry to gear up for the new challenges posed by **internet trading** as it is not going to be a short term phenomenon. Moreover, most people see routine household purchases of groceries and necessities to be a chore. Hence, the home shopping of such items would be preferred whereby consumers can simply tick the items which they require. As these products are more or less standardised, they would be rather price sensitive and do not command much **brand** loyalty. Packaging for these **products** would be strictly functional and highly skewed towards minimalist as visual appeal is not important for these products. However, it is vital that the packaging do not impair coding such that it is hidden, damaged or made unreadable by plastic overlays. Also, it has to take into account that products are now sold on a one-off basis to customers thousands of kilometres away.

Austrade does the hard sell on home brands

AUSTRALIA: 2ND HIGHEST PENETRATION OF PC

The Australia Financial Review (AFR) 04 Nov 1997 P.38

Language: ENGLISH

Search report

Australia enjoys the world's second highest level of penetration of PCs in the home of 35% and its business **trading** via the **Internet** ranked among the top around the world. The Federal Government is keen to bring its exports of communication technology to similar level. However, according to the Austrade, there are at least 2 obstacles to clear before the goal can be realised. First, Australia is not well-known as a "**brand**" supplier of high quality communications **products** and services. Second, companies are not willing to breach the distribution channels.

Schlechte Noten f r Lebensmittelhandel
GERMANY: OUTLOOK FOR FOOD TRADE
Frankfurter Allgemeine Zeitung (FA) 16 Sep 1997 p.21
Language: GERMAN

German food trade, which is dominated by discounters such as Aldi, is to change only a little in the next few years. Characteristic for the future trade will be a stronger differentiation of the product range. Stores will be more clearly divided to ones which focus only on prices and others which have more to offer to the customers. Also in Germany, retailers try to create an image by improved service, convenience and high-quality **products** and private **labels**. Also in future, it will be difficult for foreign trade companies to establish themselves in Germany. These were results of a study by Banque Paribas about German food **trade**. In the sectors of marketing, private labels and **electronic** systems, German retailers are under-developed compared with many other countries.

Auction And Moving Targets
SINGAPORE: NEW CYBERMART SHOPPING INNOVATIONS
Channel Asia (AHT) May 1997 P.9
Language: ENGLISH

CyberMart has launched the CyberMart Target and CyberMart **Auction**, which

Search report

are innovative shopping methods through the **Internet**. The Singapore Technologies Group established the virtual shopping mall, CyberMart. CyberMart Target informs shoppers about product price reductions and they may purchase the product when it is priced according to their budgets. When the product is purchased, its price is reset to its original value. Clients who hesitate will have to wait for the price cycle to occur again. CyberMart **Auction** permits product **bidding** by CyberMart **Web** site users against each other in an interactive virtual **auction**. The virtual auction has resulted in product price bargains for buyers and these **products** are **brand** new and are provided from authorised dealers only.

NY EXPORT-REKORD FOR FISK
NORWAY: RIMI CHAIN TO FOCUS ON THREE TRENDS
Dagens Naeringsliv (DN) 16 Dec 1996 p.04-05
Language: NORWEGIAN

The Norwegian consumer goods chain Rimi will focus on three of the current trends in Norway: the environment, Norwegian products and some kind of a bonus card. So says Rimi CEO Erik Hagen. Hagen expects environment-consciousness among customers to grow in the next few years. Rimi will consequently make continuous efforts to find new environment-friendly products. What is more, products that are hazardous to the environment will be removed from the product range in due course. Rimi will focus more and more on Norwegian **products**. Rimi's own **trademarks** will be produced in Norway as long as it is possible, says Hagen. In the eyes of Norwegians, products made in Norway represent high quality and new jobs in the country. The proposal, according to which costs for using a bank card will be moved from customers to stores is the most important reason why Rimi is probably going to establish a payment card of its own. Hagen is otherwise somewhat sceptical towards bonus cards. He says that for example Forbrukersamvirket <the Co-operative Wholesale Society> has not been successful with its bonus card. What is more, developing a bonus card costs enormous amounts and it is a risky business if it proves a failure, says Hagen. Rimi will launch its bonus card system in 1997 provided that it decides to do this at all. Hagen does not expect people to start **trading** over the **Internet** in the next few years. Rimi, however, will make it possible for customers to order goods home via fax or phone for a consideration, a service that Hagen expects only a small group of people will be interested in. Customers become increasingly individualistic in their actions, says Hagen. The Rimi chain will thus try to offer customers a wide range of products. What is more, it will place more emphasis on fast food as well as other types of goods such as clothes, books and multimedia.

THE CUTTING EDGE
UK: STRONG FUTURE FOR BUSINESS PRINTING
Printing World (PGW) 04 Nov 1996 p.26-27
Language: ENGLISH

Despite the advent of electronic communications in offices, the use of paper increased 20% over the last year, providing the business forms

Search report

industry with room for growth. However, the market has needed to undergo technical changes and closer cooperation between manufacturers and distributors to revive the mature market for traditional business forms. Security printing and **products** with built-in **labels**, combined with the use of digital equipment, are among the key actors in developing the market. Digital printing is also being exploited by business forms printers to move into new areas such as posters. This move is being supported by the British Business Forms Association, which has won a GBt 46,000 grant from the Department of **Trade** & Industry to develop an **Internet** service which members can use to advertise new products.

Megatrends in Vertrieb, Handel und Gesellschaft
GERMANY: SOCIAL TRENDS AND THE RETAIL TRADE
Die Tabak Zeitung (TZ) 23 Jun 1995 p.2
Language: GERMAN

A study by the Cologne-based consultancy company BBE-Unternehmensberatung identifies trends in German society and their effects on trade and marketing. The study concludes that, with increasing unemployment, the retail trade has to come to terms with an increasing polarisation of consumers between the well-off on the one hand and people with little money and plenty of free time on the other. Services will gain ground at the cost of the manufacturing sector, and retail outlets will develop into communication centres with additional services. The trade will increasingly take over the tasks of product development, production planning and marketing. The sales and margins of private **label products** will increase, and the differentiation between private labels and brands will diminish. The environment and health-consciousness of consumers will increase, and a new ethical conscience is required of the retail **trade**. The use of new **electronic** media will increase in retailing. By the year 2005 such media are expected to account for 4-7.5% of the retail trade's turnover. Technology will gain an increasing role in retail outlets, allowing increased differentiation according to criteria such as client type and time of day. Retail chains, especially those with 30-70 outlets, are forecast to get an increasing share of the market, while supermarkets will keep their shares, and the specialist trade and cash & carry outlets will be among the losers.

L'OREAL'S VIEWS ON RETAIL STORES
UK - L'OREAL'S VIEWS ON RETAIL STORES
Retail Week (RWK) 21 September 1990 p17

L'Oreal, an international cosmetics company, generates an annual turnover of GBP2.7 bil from such products as upmarket perfumery for the fast moving consumer goods (fmcg) sector. Golden UK (UK), L'Oreal's UK subsidiary, produces a number of proprietary fmcg goods and operates Laboratoires Garnier, the manufacturer of Ambre Solaire. Although Laboratoires Garnier will collaborate with retailers regarding the style of packaging to be used to make the best use of shelf space, it believes that manufacturers should have total control. Laboratoires Garnier believes that fmcg-based retailers are giving too much shelf space to own **brand products** and not enough to the products it produces. L'Oreal has a solid relationship with dept stores which are increasingly becoming associated with premium cosmetic products, but grocery stores accounted for 20% of its sales in 1989, up from 7% in 1985. The company has promoted Electronic Data Interchange (EDI) to improve order handling efficiency and speed up deliveries to its retail customers. High value orders from such companies as Tesco, Superdrug, Asda and Boots are transmitted via the **Tradanet** system of **electronic** postboxes.

Material Identity Number: G491-1998-004

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: There are many pitfalls security designers must take into account when building a cryptographic system. While hackers may attempt to break the actual algorithms, very often they exploit errors in design, implementation or installation. **Electronic** Commerce systems often make implementation **trade** -offs to enhance usability, causing subtle vulnerabilities. Daily account reconciliation, as opposed to real-time reconciliation, can give hackers hours to cover their tracks and compromise the integrity of a company's mission critical data. Key recovery databases are another source of vulnerability and can even be used to frame legitimate users. Passwords, hardware and even users themselves, are all potential weaknesses in a security system. A secure cryptographic system must defend against every possible attack, even ones that haven't been invented yet. Building a secure system is easy to do badly and very difficult to do well. Many **products** today can be **labeled** "buzzword compliant" because they use secure cryptography, but they are not secure.

Conference Date: 3-5 Dec. 1996 Conference Location: London, UK
Language: English Document Type: Conference Paper (PA)
Treatment: General, Review (G)

Abstract: Competitor information gathering is a key aspect of business planning. Information will come either from published or unpublished sources. Unpublished information will often be verified based on material from published sources. Published information is more likely to be factual and includes financial, stockmarket, press, market and industry, **product**, **trademark** and patent sources. Much published information is now available **online** but the specific skills of a dedicated competitor analyst are required best to utilise these information sources. The **traditional online** hosts such as FT Profile, MAID, Data-Star and Dialog each host databases that can used to obtain competitor intelligence. Typical databases will include those from Dun and Bradstreet, Reuters Textline, the Derwent World Patent Index, Kompass, Investext and others. The Internet has recently become an important source for competitor information, holding competitor promotional material as well as items from independent sources. The Internet search engines such as Digital's Alta Vista can locate information of interest on both the World Wide Web and Usenet. (3 Refs)

Internet **fraud: steer clear of trademark troubles -- Prevent your trademarked product from becoming the next hot counterfeit item on the Internet**

Lavery, Liam B

e-Business Advisor, July 1, 1999, v17 n7 p26-29, 3 Page(s)

ISSN: 1098-8912

Presents an update on counterfeit activities and e-commerce Web sites. Indicates that Cyveillance, a security consulting firm, has discovered that 10-20 percent of the 150,000 Web sites it reviewed were marketing counterfeit goods. States that counterfeiters can open-up and shut-down fast, moving on to another site and hide behind various disguises. Says that tactics include embedding key words into cryptic metatags, like the name of a well-known brand, which when searched upon will bring up the site when a search engine notes the descriptive, but deceptive, word. Reports that there are groups fighting for enforcement of **trademarks** and the International AntiCounterfeiting Coalition (IACC) has a **Web** site for monitoring developments in **trademark** issues. Adds that the Software & Information Industry Association tracks counterfeit sites. Notes that Playboy Enterprises shut down a site for misuse of its logo. (sps)

What do you name a Net firm? Hurry, the choices are dwindling

Marlatt, Andrew

Internet World, May 10, 1999, v5 n18 p1, 10, 2 Page(s)

ISSN: 1081-3071

Reports that a record 1,925 companies changed their names last year, an 18 percent increase over the previous year. Adds, however, that last year's record is already being overtaken in the first four months of this year by Internet companies alone. Says that part of the surge in activity was caused by companies moving their businesses onto the Internet, but notes that many were already on the Web. Indicates that the explosive growth of the Web has caused many firms to reexamine whether their names still

Search report

distinguish them from the increasing competition. Explains that the cost of a company name change can easily cost hundreds of thousands of dollars and involve a branding firm to create the name, a creative agency to market it, fees to purchase the URL and register the **trademark**, **Web** site redesign, and small **items** such as stationery, business cards, and promotional items. Includes one sidebar. (JC)

Leading the charge; the apparel giants are marching online, but will they enlist the right tactics to stay on top?

Sperling, Nicole

Internet Business , December 1, 1998 , v3 n12 p44-50, 6 Page(s)

ISSN: 1521-2408

Interviews three long-established apparel retailers to discover the status of their online business, what challenges they faced, and how they know that market share is there. Cites Judy Neuman, VP of interactive media at retailer and cataloger Eddie Bauer, who reports that it offers close to 100 percent of its catalog online and that its Web site has grown by 300 to 500 percent in the last two years. Cites Tony Spring, VP of marketing at Bloomingdale's, who notes they want to present Bloomingdale's as the **brand** that provides **merchandise** that is first, new, or only available at its stores. Says it will have 3,000 products online by year's end. Reports that Macy's three-year old site is used primarily for market research. Cites Kent Anderson, president of Macy's.com who, said Macy's site is small, compared to its \$8 billion **traditional** business, but his objective is to get **online** sales to 10 percent of overall sales. Includes seven photos, one sidebar, and one chart. (MAP)

Network Solutions partners with Centraal

Petersen, Scot

PC Week , December 21, 1998 , v15, n51 p47, 1 Page(s)

ISSN: 0740-1604

Company Name: Network Solutions; Centraal

URL: <http://www.networksolutions.com> <http://www.centraal.com>

Reports that Centraal Corp. of Palo Alto, CA and Network Solutions Inc. of Herndon, VA formed a partnership which could have a major effect on the way people use the Web to find information or products. Says Network Solutions, the leading registrar in the world, maintains more than 3 million domain names and Centraal is the creator of RealNames Web page addressing system, which assigns **trademark** or brand names to Web pages to enable direct access to them, rather than going through a search engine or a top-level domain. Reports Network Solutions invested \$4.2 million in Centraal last week, agreeing to market, sell and service RealNames to domain name owners, both directly and through Network Solutions' channels. Says the two companies want to keep the current top-level domain registration process intact, but use the RealNames system to more easily drive traffic to the intended site, **brand** , or **product** . Thomson & Thomson announces enhancement to TRADEMARKSCAN searches on SAEGIS

Information Today , December 1, 1998 , v15 n11 p17, 1 Page(s)

ISSN: 8755-6286

Company Name: Thomson & Thomson

URL: <http://www.thomson-thomson.com>

Product Name: SAEGIS

Announces that Thomson & Thomson of North Quincy, MA (617) has enhanced the **TRADEMARKSCAN** search feature of its SAEGIS **online** service. Says that the product now supports searching multiple **TRADEMARKSCAN** databases simultaneously on the SAEGIS platform. Adds that SAEGIS has a new interface that enables users to select any combination of 17 databases for simultaneous searching, and presents the results in a single list. Notes that a preliminary Hit Count button provides users with the total number of hits for each register at no charge. Indicates that selected hits can be viewed in one report in a user-defined format, and says that the list can be saved to the user's Inbox, or used to create a Custom Report for printing. Also says that the system supports customization of settings and default databases. (JC)

Net firms spending millions to build brands online

Hoffman, Karen Epper

Internet World , April 27, 1998 , v4 n16 p1, 45, 2 Page(s)

ISSN: 1081-3071

Reports on the trend among **online** companies to spend millions of

Search report

dollars in **traditional** advertising media. Highlights recent efforts by theglobe.com and Auto-By-Tel, noting that Auto-By-Tel's Web site visits shot up 17-fold following their SuperBowl commercial, and purchase requests nearly doubled. Says theglobe.com, competing with America Online for the chat audience, is spending two-thirds of its advertising budget offline. Adds the company claims 1.4 million members, with 100,000 new members joining each month. Cites Amazon.com, Yahoo, America **Online** , and E***Trade** as other cases attesting to the success of offline brand building. Reports that **Internet** companies heavily invested in **traditional** media advertising find it an effective way to build **brands** that transcend the **products** , reach prospective customers who are not online, and brand images of strength and credibility. Includes one photo. (JC)

ISSN: 1090-512x

Company Name: eToys; Auto-by-tel; Dell Computer

URL: <http://www.etoys.com> <http://www.autobytel.com> <http://www.ameritrade.com> <http://www.dell.com>

Presents a profile of four companies demonstrating their **Web** -based business models, eToys, Auto-By-Tel, E* **Trade** , and Dell. Provides the step-by-step process for purchasing through each of these Web sites. Includes a sidebar which explains the process of building a quality, high-end website and explains what is necessary to do so, including: focused, meaningful copy, a reliable and secure back-end system, and a creative use of layout and graphics. Says that concentrating on each element that goes into creating Web sites is the most important thing a company can do to ensure the final product will be the one that earns the attention of users. Contains ten screen displays. (EB)

Medical hardware & software buyers' guide

M.D. Computing , November 1, 1996 , v13 n6 p485-576, 92 Page(s)

ISSN: 0724-6811

Presents a buyers' guide to medical computing hardware and software. Features an alphabetical list of vendors and an alphabetical list of **products** by **trade names** of **products** in the following categories: CD-ROMs; **online** services; management systems; hardware; application software; and indexes. Operating systems are indicated for each product, and lists of e-mail addresses and Web sites are included. Includes photos. (dpm)

Thomson & Thomson launches Trademarkscan-U.K.

Information Today , April 1, 1991 , v8 n3 p76, 1 Page(s)

ISSN: 8755-6286

Company Name: Thomson & Thomson

Product Name: Trademarkscan-U.K.

Announces the release of **Trademarkscan** -U.K. (\$130/connect hour), an **online** patent database from Thomson & Thomson of Quincy, MA (800). Says **Trademarkscan** features over 600,000 actively-registered trademarks and applications filed with the Patent Office of the United Kingdom. Also says the database can be used for conducting preliminary screening searches, supporting trademark administration, and tracking competitors' British trademarking activities. (tbc)

ABSTRACT: International companies are buying **Internet** addresses from Turkmenistan to show that their **products** are **trademarked** . The Turkmen government has signed a profit-sharing deal with the U.K. company NetNames for the sale of domain names ending in .tm. This could lead to future legal battles as there is no guarantee that other companies will not register similar names.

Drug companies link to consumers

Search report

Rogers, Ronald S;
Chemical & Engineering News v. 77 no28 (July 12 1999) p. 18-20
DOCUMENT TYPE: Feature Article ISSN: 0009-2347

ABSTRACT: Pharmaceutical companies are moving toward using the **Internet** to reach consumers directly. **Traditionally**, the EDI system used the **Internet** to control business-to-business transactions. However, companies are beginning to react to studies, such as the one completed by Deloitte and Touche of New York, which reports that most consumers rate the health information on the Internet as useful. By early 1997, the Internet had more than 5,000 medical advice sites, according to Boston Consulting Group. Pharmaceutical companies are reacting to this information by creating "communities of interest," centered around diseases and treatment options. Although prescription restrictions mean that companies cannot sell directly to consumers, communities such as these are important for generating **brand** loyalty, understanding customer needs, raising **product** awareness, and influencing consumer behavior. A sidebar lists some major drug Web sites, and a graph charts the increasing use of the Internet for health information.

CyberCut: a World Wide Web based design-to-fabrication tool
Smith, Charles S; Wright, Paul K
Journal of Manufacturing Systems v. 15 no6 (1996) p. 432-42
DOCUMENT TYPE: Feature Article ISSN: 0278-6125

ABSTRACT: For some time there has been an expectation that a "mechanical MOSIS" system will soon become available to mechanical designers for the rapid manufacture of functional prototypes. Recent advances in client-server interaction, automated process planning, and rapid manufacturing services now make it possible to provide a World Wide Web based, seamless CAD/CAPP/CAM system. Currently, the following services are provided via the **Internet**: (1) a design-for-manufacture CAD interface, written in Java[**trademark**], (2) a choice between two **CAPP** systems, and (3) access to an open architecture machine tool for fabrication of mechanical parts. Together, these modules comprise CyberCut, a mechanical design and manufacturing service. CyberCut is the extension of an already proven Integrated Manufacturing and Design Environment (IMADE) into a distributed agent environment. It will provide users access to a rapid prototyping service in a variety of materials, with the [plus or minus]0.002 in. tolerances made possible by typical CNC machining. Reprinted by permission of the publisher.

SYSTEM FOR PENSION-OPERATION ADAPTIVE **ELECTRONIC TRADING**

Search report

INTL CLASS: G06F-017/60 ; G06F-019/00

ABSTRACT

... To purchase a financing article which is a decision contributory type pension and to perform **ordering** and account **settlement** fast safely with good operation efficiency providing a pension operation **processing** means, etc., which **processes** account opening, article selection, **ordering**, **settlement**, and transaction detail inquiry on a terminal screen through a communication line.

SOLUTION: A terminal machine 1 is equipped with a program 12 for an **electronic trading** system, a program 15 for an **electronic** banking system associated with it, and a payroll program 16 as one of operations of ...

... communication means 14 and a processing means 17 for pension operation. Then the pension operation **processing** means 17 **processes** the account opening, article selection, **ordering**, **settlement**, transaction detail inquiry, etc., on the terminal screen through the communication line 21. Therefore, an...

... directly from an investment trust selling company 30 through the communication line 21, and the **ordering** and account **settlement** is made speedily with safety.

SYSTEM FOR INVESTMENT-TRUST-OPERATION ADAPTIVE **ELECTRONIC TRADING**

INTL CLASS: G06F-017/60 ; G06F-019/00

ABSTRACT

PROBLEM TO BE SOLVED: To **purchase** financing articles, to speed up **ordering** and account **settlement**, and to obtain good operation efficiency and safety by providing an enterprise fund operation **processing** means, etc., which **processes** account opening, article selection, **ordering**, **settlement**, and transaction detail inquiry on a terminal screen through a communication line.

SOLUTION: A terminal machine 1 has a program 12 for the **electronic trading** system, a program 15 for an **electronic** banking system associated with it, and a finance and account program 16 for the operation of an enterprise. Then the account opening, article selection, **ordering**, **settlement**, and transaction detail inquiry are **processed** on the

Search report

terminal screen through a communication line. Therefore, an article can be purchased directly...

... 21 and 31, and the money can be transferred immediately when necessary, so that the **ordering** and **settlement** are made quick with good operation efficiency and safety.

WIPO solicits international bids for network project
WORLDWIDE: BID TO BUILD INFORMATION NETWORK
The Korea Herald (XBF) 22 Oct 1998 p.8
Language: ENGLISH

The World Intellectual Property Organisation (WIPO) is looking for a contractor to build WIPOnet, a worldwide information network for intellectual property (IP) offices around the globe. WIPOnet aims to foster the exchange and transmission of IP data between member states, while allowing easy access to collective published technology and patent examination records of other countries. The net will also meet the increasing need to offer public access to published IP information. A main component of the net will be the construction of digital libraries, which will offer cheaper ways to distribute IP information to interested users. WIPO is preparing to **solicit bids** for global high-speed **Internet** connections for the use of around 200 IP organisations within its member states. It intends to announce the bidding in November 1998, with the application schedule to end in January 1999. The successful contractor will be chosen in March 1999, who will be required to develop and deploy the network by the end of 1999. Network builders or system integration firms around the globe will be qualified to bid. A consortium is also possible.

Treatment: General, Review (G)

Abstract: The 1990s have seen the start of a changeover in Polish State Railways' (PKP) signalling systems from relay systems to electronics. The first electronic interlocking systems have been installed at Ozarow and Opalenica stations on the electrified double-track line linking Warsaw and Kunowice. On the basis of the **bids** received in response to an **invitation to tender** for **electronic** interlocking systems, PKP decided in favour of using systems from ABS Signal and Alcatel SEL. The article looks at the general features of the relay interlocking systems in use on PKP, and also describes and compares the first electronic interlocking systems. (0 Refs)

More leads for supplies -- Web site helps users solicit bids for products

Dalton, Gregory

Information Week , August 30, 1999 , n750 p83, 1 Page(s)

ISSN: 8750-6874

Company Name: rfpMarket.com; VerticalNet

Examines the company rfpMarket.com, which lets companies seeking a particular product or service anonymously list their request for proposals on its Web sites. States there are specific vertical industries such as computers, health, manufacturing, and construction, which rfpMarket.com then tries to find suppliers willing to compete for that business and forwards the leads via e-mail to the buyer. Notes this is similar to the lead-generation service pioneered by VerticalNet Inc., which operates dozens of sites where buyers and sellers in highly specific industries can interact and conduct online auctions. However, adds that rfpMarket.com has no plans for hosting auctions or other transactions. Notes that suppliers who participate will be charged for the service. (sps)

Web help for small e-businesses -- Multiple portals provide information and services to get connected

Karpinski, Richard

InternetWeek , May 31, 1999 , n767 p19, 1 Page(s)

ISSN: 0746-8121

Reports that e-commerce tools and techniques that have helped large companies transform their businesses are beginning to filter down to small and mid-sized shops. Says these services move beyond mere site building into more sophisticated functions such as **Web** procurement and **online bid** management tools. Discusses Works.com, a **Web** portal offering e-procurement; BuyersZone.com, a **bid** management system; BizBuyer.com, a **RFQ** service for **Internet** services; Workz.com, a portal focused on getting established online; FreeAgent.com for e-lancers sell services and form teams; and iNiku, a portal to help home users and independent consultants build businesses. Notes Opus 360 Corp. will launch FreeAgent.com next month as a portal serving independent knowledge workers. Says it will feature ePortfolios, a way to present credentials to potential customers. Says contractors and consultants comprise a large portion of the Internet economy. (sps)

New media meets old politics -- When Planned Parenthood solicited bids for a \$1 million Web site, some interactive agencies found the project too hot to handle

Ward, Jacob

The Industry Standard , January 25, 1999 , p22, 1 Page(s)

ISSN: 1098-9196

Company Name: Planned Parenthood Federation, The

Product Name: TeenWire

Recounts issues of political controversy raised when The Planned Parenthood Federation of America requested proposals from Web agencies for the building of its TeenWire Web site. States that the Web site has as its mission to serve as an anonymous resource for reliable information about sexual health. Says the volatile politics of abortion made it no ordinary project. Reports Planned Parenthood asked each finalist in the project how their business would be affected when other clients found out about the project. Says early Web developers believed the Internet would break old rules. States however, some businesses are forced to consider ideological sensitivities when, as Ron Bloom, the current CEO of Think New Ideas says, businesses are evaluating responsibilities to clients, investors, and themselves. Reports that Atomic Vision, a Web development company in San Francisco, CA was awarded the project Includes one photo. (bjp)

Is online ready for primetime?

Quint, Barbara

Information Today , June 1, 1994 , v11 n6 p7-9, 3 Page(s)

ISSN: 8755-6286

Search report

Company Name: Mead Corporation; Mead Data Central

QUINT'S ONLINE column speculates on the developments regarding Mead Corporation's announced intention to divest Mead Data Central (MDC), its online database company. Infers from the openness of the announcement that the company was, in essence, **soliciting bids**. Asks "'can the **traditional** leaders of the **online** database industry get out of their niches and into mainstream marketing?'" Surmises that purchasers may come from one of two broad categories: content-based concerns like publishers or search services, or tool-based businesses like computer or communications companies. Concludes that tool-dominant companies may be able to infuse MDC with the technology it needs to compete effectively, but cautions that these organizations often have a "'dangerous indifference to content.'" NASA solicits bids via Internet

Asker, James R;

Aviation Week & Space Technology v. 141 (Oct. 17 '94) p. 58

DOCUMENT TYPE: Feature Article ISSN: 0005-2175

ABSTRACT: NASA is enhancing its efforts to make procurement information easily accessible on the Internet computer network. The agency wants to move away from the Commerce Business Daily, the U.S. government's yellow newspaper listing opportunities for contractors in scores of federal agencies and departments. NASA aims to make the data quicker and easier for suppliers to get and to speed the contracting process. The procurement reform act signed last week by President Bill Clinton granted NASA the authority to test the solicitation of bids for mid-range procurement on the Internet. These contracts range from \$25,000 to \$500,000 annually and must total no more than \$2.5 million in a 5-year period.

ABSTRACT EP 967088 A2

Provided is a recording medium comprising alumina hydrate, wherein said
alumina hydrate having a boehmite structure and containing silica within
alumina hydrate particles, in part of or a whole of said alumina hydrate
particles, and the crystallinity of said alumina hydrate obtained by an
X-ray diffraction analysis of said recording medium is in a range of from
15 to 80.

ABSTRACT EP 963791 A2

An array of reaction assemblies for heating and cooling a plurality of reaction vessels. Each reaction vessel assembly including a heat conductive reaction block having an exterior wall and a reaction vessel receiving cavity formed in the block inwardly of the exterior wall. A thermoelectric module is mounted in heat transfer engagement with the exterior wall of the heat conductive reaction block. A fluid heat exchange element is mounted in heat transfer engagement with the thermoelectric module. The thermoelectric module has its junctions to selectively remove heat from the exterior wall of the reaction block or to supply heat to this exterior wall. Each thermoelectric module has thermoelectric junctions cascaded for increased heating and cooling range and a plurality of these junctions to increase capacity.

JACKSON et al.: "Optical fiber coupling approaches for multi-channel laser and detector arrays";

ABSTRACT EP 413182 A2

A localized cooling method allows the sequential alignment and soldering of one optical fiber (30,31) at a time to a semiconductor package (26), while previously aligned and soldered optical fibers are held fixed. This method utilizes the mechanical property of a sharp melting point eutectic alloy solder or a pure metal solder for the fiber connections and is effective for multi-fiber optoelectronic packages demanding stability and high precision. A package design for optoelectronic components requiring multi-fiber alignment incorporates this feature of localized cooling internally. The localized cooling method and the novel package utilizing this method internally make it possible to eliminate the tilted angle optical fiber alignment problem by mounting tilted facet optical amplifier components at a predetermined offset angle.

ABSTRACT EP 415094 A2

A method of compensating for the angular coupling of optical fibers to a tilted facet optoelectronic component (26) involves a precise calculation of the coupling angle with respect to the active layer of the component and with respect to the side walls of the package in which the component is to be mounted. With these angles computed, the tilted facet component is positioned on a carrier (24) at an offset to the perpendicular such that input/output fibers (30,31) can exit the component package perpendicularly to its sidewalls. The component (26) is secured to the carrier (24) by a solder having a high melting point such that subsequent soldering of parts to the carrier will not affect the component positioning. A localized cooling method then allows the sequential alignment and soldering of one optical fiber at a time to the offset tilted facet component, while previously aligned and soldered optical fibers are held fixed. This method utilizes the mechanical property of a sharp melting point eutectic alloy solder or a pure metal solder for the fiber connections and is effective for multi-fiber optoelectronic packages demanding stability and high precision. A package design for tilted facet optoelectronic components requiring multi-fiber alignment incorporates this feature of localized cooling internally. The package utilizing localized cooling method internally eliminates the

Search report

tilted facet-optical fiber alignment problem, while providing standard lead configurations.

ABSTRACT EP 392092 A1

A method of preparing light-sensitive silver halide emulsions and photographic materials incorporating layers of such emulsions are described.

This method comprises preparing a light-sensitive silver halide emulsion by precipitating silver halide in the presence of colloidal silicic acid serving as protective colloid and an onium compound.

ABSTRACT EP 298690 A1

A sheetlike laminated air cathode (16) including first (34) and second (38) layers having opposed major surfaces (17, 18) respectively exposed for contact with a liquid electrolyte and with air, the layers also having facing major surfaces, and the second layer (38) being permeable to air but not to the liquid electrolyte; and a current collector (36) in contact with the first layer (34) and connectable to external electrical circuitry. The first layer (34) is a nonwoven fibrous web impregnated with a mixture of carbon particles and a nonfibrous polymeric substance for holding the carbon particles in the web. The facing major surfaces of the first and second layers (34, 38) are bonded together by heat seal coating material (40) distributed on those major surfaces in such manner as to provide an array or network of areas free of coating material extending substantially uniformly thereover.

ABSTRACT EP 228791 A2

This invention provides a device for placing elongate joint-forming preforms such as solder columns on electronic components such as chip carriers using a water soluble retaining member which positions and holds the preforms while they are attached to the electronic component. The retaining member is then dissolved in hot or cold water. The retaining member is constructed of water soluble or water dispersible paper in combination with coatings of or layers of a water soluble material such as polyethyleneoxide. The water soluble retaining member can be a laminate of alternating layers of water soluble paper and water soluble polymeric material.

ABSTRACT EP 217032 A2

A method of producing a composite elastic material comprises stretching an elastic web (4) to elongate it, for example, elongating a nonwoven web of meltblown elastomeric fibers, and bonding the elongated web to at least one gatherable web (16), (20), such as a spunbonded polyester fiber material, under conditions which soften at least a portion of the elastic web to form the bonded composite web of elastic material. The composite material (22) is relaxed immediately after the bonding to prevent the elastic web from losing its ability to contract from the stretched dimensions which it assumed during the bonding step. Such immediate relaxation of the composite material after the bonding step results in the elastic web retaining its ability to contract so that, upon termination of the elongating force, the elastic web contracts to form gathers in the gatherable web. The bonding may be effectuated by pattern embossing overlaid elastic and gatherable webs with at least portions of the elastic web heated to at least its softening temperature. The resultant composite elastic material comprises a coherent elastic web which is bonded to at least one coherent gatherable web whereby the gatherable web is extensible and contractible with the elastic web upon stretching and relaxing of the composite material.

English Abstract

Disclosed are systems and methods for harnessing existing, static content as a new platform for electronic commerce transactions. One method for electronic commerce generates revenue from a Web page of a content provider. A Web page is constructed and conveyed to a client-side browser in response to a request to load the Web page of the content provider. The Web page is constructed so as to include an activated image (150) from a host server within an HTML document of the content provider. The so constructed Web page is then conveyed to the client side browser. A host server then receives a request from the client-side browser in response to an interaction with the activated image. The request is forwarded from the host server to a prescribed third-party for fulfillment. Therefore, the third-party is charged for the forward of the request.

French Abstract

L'invention concerne des systemes et de procedes permettant d'amenager un contenu existant statique de maniere a former une nouvelle plate-forme destinee aux transactions de commerce electronique. L'un de ces procedes de commerce electronique permet de generer un revenu a partir de la page Web d'un fournisseur de contenu. On construit une page Web, qu'on envoie a un navigateur cote client en reponse a une demande de chargement de la page Web du fournisseur de contenu. Cette page Web est structuree de maniere a comprendre une image (150) activee provenant d'un serveur hote, placee a l'interieur d'un document HTML du fournisseur de contenu. La page Web ainsi structuree est ensuite envoyee au navigateur cote client, Le serveur hote recoit ensuite une demande de la part du navigateur cote client en reponse a une interaction avec l'image activee. Le serveur hote rechemine cette demande jusqu'au tiers indique, afin que ce dernier puisse donner une suite a la demande. Un paiement est demande au tiers pour le reacheminement de la demande.

English Abstract

A system, method and article of manufacture are provided for providing an interface between a first server and a second server with a proxy component situated therebetween. Initially, a request for a business object is identified by an application on the first server. The first server is then connected to the second server. Next, selection criteria from the first server is transmitted to the second server. In response to the selection criteria, the first server receives a first recordset and a second recordset from the second server. Business data is included in the first recordset and result codes are included in the second recordset. The first and second recordsets are mapped to the business object and the business object is sent to the application on the first server.

French Abstract

L'invention concerne un systeme, un procede et un article manufacture destines a fournir une interface entre un premier et un second serveurs avec, entre les deux, un composant mandataire. A l'origine, une demande d'objet commercial est identifiee par une application sur le premier serveur, lequel est alors relie au second serveur. Puis, des criteres de selection sont transmis du premier au second serveurs. En reponse aux criteres de selection, le premier serveur recoit du second serveur un premier puis un second ensembles d'articles. Des donnees commerciales sont incluses dans le premier ensemble d'articles et des codes de resultats dans le second ensemble d'articles. Une correspondance est etablie entre les premier et second ensembles d'articles et l'objet commercial, lequel est envoye a l'application sur le premier serveur.

English Abstract

A system and method provide a web-based infomediary for dissemination of intellectual property transfer information among multiple users via a global computer network such as the World Wide Web. The system and method can be used to provide network users with information to facilitate transfer of intellectual property rights by assignment or license. Also, the system and method can be configured to collect bids and offers from parties seeking to acquire rights, or conduct a web-based auction. In this manner, the system and method provide a web-based infomediary in the sense that they facilitate person-to-person or business-to-business online exchanges that leverage the Internet to unite buyers and sellers into a single, efficient virtual marketplace that provides a concentration of pertinent information.

French Abstract

L'invention concerne un systeme et un procede qui fournissent un infomediaire web qui utilise un reseau informatique universel, tel qu'Internet, pour disseminer des informations de transfert de droits de propriete intellectuelle aupres de plusieurs utilisateurs. Le systeme et le procede de l'invention peuvent etre utilises pour fournir a des utilisateurs du reseau des informations qui facilitent le transfert de droits de propriete intellectuelle par attribution ou licence. Le systeme et le procede de l'invention peuvent egalement etre configures pour recueillir des offres de vente ou d'achat emanant de parties souhaitant acquerir des droits ou conduire des ventes aux encheres par Internet. Le systeme et le procede de l'invention constituent ainsi un infomediaire web en ce qu'ils facilitent des echanges en ligne inter-personnelles ou inter-entreprises, en utilisant le levier qu'est Internet pour reunir des acheteurs et des vendeurs autour d'un marche virtuel unique efficace offrant une concentration d'informations pertinentes.

English Abstract

A system and method for finding and serving consumer product;ndash; related information over the Internet (10) to consumers. The system includes Internet Information servers (33) which store information pertaining to Universal Product Number (e.g. UPC number) preassigned to each consumer product registered with the system, along with a list of Uniform Resource Locators (URLs) that point to the location of one or more information resources on the Internet, e.g. World Wide Web;ndash; sites, which are related to such registered consumer products. Upon entering the UPC number into the system using a conventional Internet browser program (13), the menu of URLs associated with the entered UPC number is automatically displayed for user selection. The displayed menu of URLs are categorically arranged according to specific types of product information.

French Abstract

L'invention a trait a un systeme ainsi qu'au procede afferent permettant de rechercher, sur Internet (10), des informations relatives a des produits de consommation, et de les faire parvenir a des consommateurs. Ce systeme comporte des serveurs d'information Internet (33) contenant en memoire des informations relatives au numero universel de produit (le numero de code universel des produits (CUP), par exemple), attribue par avance a chaque produit de consommation, enregistre par le systeme, ainsi qu'une liste de localisateurs de ressources uniformes (URL) designant l'emplacement d'une ou de plusieurs ressources sur Internet, des sites du W3 notamment, en relation avec lesdits produits de consommation enregistres. Une fois le numero CUP introduit dans le systeme au moyen d'un logiciel classique de navigation d'Internet (13), le menu des URL associe au numero CUP s'affiche systematiquement de maniere que l'utilisateur puisse effectuer sa selection. Le menu affiche des URL est agence par categories en fonction de types specifiques d'informations relatives a des produits.

A novel electronic information transport component (14) can be

Search report

incorporated in a wide range of electronic information products, for example magazine collections, to automate the mass distribution of updates, such as current issues, from a remote server to a wide user base having a diversity of computer stations. Advantages of economy, immediacy and ease of use are provided. Extensions of the invention permit automated electronic catalog shopping with order placement and, optionally, order confirmation. A server based update distribution service and a sponsor pricing system for the Internet, or the like, is also provided.

Japanese Abstract

Un nouveau composant de transport d'information electronique (14) peut etre incorpore dans une grande variete de produits d'information electronique, par exemple des collections de magazines, afin d'automatiser la distribution en masse des numeros actuels, a patir d'un serveur a distance vers une large base utilisateur ayant une grande diversite de stations informatiques. Ce systeme presente des avantages considerables en matiere d'economie, de rapidite et de commodite. Des extensions de cette invention permettent de faire ses courses a l'aide d'un catalogue electronique automatise qui permet de placer une commande et, eventuellement, de confirmer la commande. Un service de distribution mis a jour et base sur le serveur ainsi qu'un systeme d'etablissement des prix de sponsors pour le reseau Internet ou autres sont egalement prevus.

English Abstract

Search report

A system and method for generating a parametric profile of an object to be modelled is shown which receives input from a user in the form of equations, generates further equations inherent to a profile definition, prioritizes the equations into ranked classes, sorts the prioritized equations to thereby create an ordered solved equation list, solves the sorted equations in the order they appear on the solved equation list and generates a profile of geometry entities constructed from the solutions of the solved equations. The system and method automatically constrain unknown variables within any under-populated equation sets based on heuristics and employ any redundant equations to determine and resolve conflicts among the equations to be used for generating the profile.

Japanese Abstract

Systeme et procede permettant de produire le profil parametrique d'un objet a modeliser. Ledit systeme recoit des entrees operees par un utilisateur sous forme d'equations, produit d'autres equations inherentes a une definition du profil, classe les equations par ordre de priorite, trie les equations ayant fait l'objet d'un classement pour creer une liste d'equations resolues ordonnee, resout les equations trieess dans l'ordre dans lequel elles apparaissent sur la liste d'equations resolues et produit un profil d'entites geometriques construites sur la base des solutions des equations resolues. Lesdits systeme et procede contraignent des variables inconnues dans n'importe quelle serie d'equations peu peulee sur la base de l'heuristique et emploient toute equation redondante pour determiner et resoudre des conflits parmi les equations utilisees pour produire le profil.

English Abstract

An alarm system detects, signals and/or reports the occurrence of a penetration towards or an unauthorized entry into a defined area, such as towards or into a closed automobile. The alarm system includes a proximity detector (122) to detect an intrusion into a prescribed zone or region (134) around the defined area, and one or more sensors (126, 128) to sense an unauthorized entry event or attempted entry event into the defined area. The alarm system further includes means for generating vocal speech warning signals (132) for the purpose of: a) drawing attention to the fact that an unauthorized penetration or entry event has been sensed, and b) providing vocal reports to indicate the status of the system and to alert the owner of the system that a prior unauthorized event was detected. During use of the system, the user of the system can select various operating modes and report options, thereby providing flexibility in how the system is used.

Japanese Abstract

Un systeme d'alarme detecte, signale et/ou rapporte une penetration vers ou dans une entree non autorisee d'une zone definie telle qu'une voiture automobile fermee. Le systeme d'alarme comprend un detecteur de proximite (122) qui detecte une intrusion dans une zone ou region prescrite (134) autour de la zone definie, et un ou plusieurs detecteurs (126, 128) pour detecter une entree non autorisee ou une tentative d'entree dans la zone definie. Le systeme d'alarme comprend en outre des moyens qui generent des signaux vocaux d'alerte (132) dans le but de a) attirer l'attention sur le fait qu'une entree ou introduction non autorisee a ete detectee et b) etablir des rapports vocaux indiquant l'etat du systeme et alertant le proprietaire du systeme pour lui signaler qu'un evenement non autorisee anterieur a ete detecte. Pendant l'utilisation du systeme, l'utilisateur du systeme peut selectionner divers modes de fonctionnement et des options de rapport rendant ainsi l'utilisation du systeme flexible.

ABSTRACT EP 370146 A1

A system (50) for interactive on-line electronic communications and processing of business transactions between a plurality of different types of independent users including at least a plurality of sellers, and a plurality of buyers, as well as financial institutions, and freight service providers. Each user can communicate with the system from remote terminals (62,64,68,70) adapted to access communication links and the system may include remote terminals (62,64) adapted for storage of a remote data base (53). The system includes a data base (72) which contains user information. The data base is accessed via a validation procedure to permit business transactions in an interactive on-line mode between users during interactive business transaction sessions. The system permits concurrent interactive business transaction sessions between different users.

Detailed Description

Claims

Fulltext Word Count: 20851

English Abstract

Herein is described a tokenless biometric method for processing electronic transmissions, using at least one user biometric sample (62), an electronic identifier (12) and an electronic rule module clearinghouse (14). The steps for processing of the electronic transmissions comprise a user registration step, wherein a user registers with an electronic identifier (12) at least one registration biometric

Search report

sample taken directly from the person of the user. A formation of a rule module (50) customized to the user in a rule module clearinghouse (14), wherein at least one pattern data (54) of a user is associated with at least one execution command (52) of the user. A user identification step, wherein the electronic identifier (12) compares a bid biometric sample taken directly from the person of the user with at least one previously registered biometric sample (24) for producing either a successful or failed identification of the user. In a command execution step, upon successful identification of the user, at least one previously designated rule module (50) of the user is invoked to execute at least one electronic transmission. The above-mentioned steps are conducted in a manner wherein a biometrically authorized electronic transmission is conducted without the user presenting any personalized man-made memory tokens such as smartcards, or magnetic swipe cards.

French Abstract

La presente invention concerne un procede biometrique sans marque d'authentification permettant de traiter des transmissions electroniques par l'utilisation d'au moins un echantillon (62) biometrique d'un utilisateur, d'un identificateur (12) electronique et d'un centre a modules de reglement electroniques. Le traitement de ces transmissions electroniques comprend l'etape d'enregistrement de l'utilisateur, dans laquelle un utilisateur enregistre a l'aide d'un identificateur (12) electronique au moins un echantillon biometrique pris directement sur la personne de l'utilisateur. Ce traitement comprend aussi la formation d'un module (50) de reglement personnalise a l'utilisateur dans un centre (14) de modules de reglement ou l'on associe au moins une configuration de donnees (54) a au moins une commande (52) d'execution de l'utilisateur. Ce traitement comprend encore une etape d'identification de l'utilisateur, dans laquelle l'identificateur (12) electronique compare l'offre d'un echantillon biometrique directement pris sur la personne de l'utilisateur avec au moins un echantillon (24) biometrique enregistre auparavant de facon a obtenir soit un succes, soit un echec dans l'identification de cet utilisateur. Ce traitement comprend enfin une etape d'execution de commande: apres une identification reussie de l'utilisateur, on appelle au moins un module (50) de reglement designe prealablement de l'utilisateur de facon a executer au moins une transmission electronique. On conduit les etapes susmentionnees de facon qu'une transmission electronique biometrique autorisee soit mise en oeuvre sans que l'utilisateur n'ait a presenter une marque d'authentification fabriquees a memoire telles que les cartes a puce ou les cartes a balayage magnetique.

English Abstract

A system and method for warranting the identity of a party over an electronic network is disclosed. The system is based on an operating model with five primary parties: a root entity (102), an issuing participant (10), a subscribing customer (20), a relying participant (30) and a relying customer (40). Communication between parties is secured through the use of digital certificates.

French Abstract

L'invention concerne un systeme permettant de garantir l'identite d'un interlocuteur relie par un reseau electronique. Le systeme est base sur un modele de fonctionnement compose de cinq parties primaires : une entite racine (102), un participant emetteur (10), un client souscripteur (20), un participant de reference (30) et un client de reference (40). Les communications entre les parties sont securisees grace a l'utilisation de certificats numeriques.

English Abstract

A system and method for facilitating communication between a plurality of buyers (10) a plurality of suppliers (12) is provided. The communication system provides for coordinated message and response tracking within an electronic marketplace environment. Members of an electronic community, buyers (10) and suppliers (12), may submit information to a central database (16) maintained by a service provider (14). Such information may comprise company profile and product information. A marketplace administrator may browse the database (16) and assemble a list of suppliers (12) and buyers (10) who will receive an invitation for membership in a private or public marketplace. A broadcast message (68) and various response (78) tracking objects are assembled into a single marketplace object. The marketplace object serves as a mobile repository for all commercial interaction in furtherance of completing a purchase transaction between the buyers (10) and suppliers (12). Suppliers (12) who accept the marketplace membership invitation are allowed to attach some or all of their product information to the marketplace object.

French Abstract

La presente invention concerne un systeme et un procede qui facilitent la communication entre une pluralite d'acheteurs (10) et une pluralite de fournisseurs (12). Ce systeme de communication permet l'envoi de messages coordonnes et le suivi des reponses dans un environnement de marche electronique. Les membres d'une communaute electronique, des acheteurs (10) et des fournisseurs (12), peuvent soumettre des informations a une base de donnees centrale (16) maintenue par un fournisseur de service (14). Ces informations peuvent comprendre des profils de societe et des informations relatives a des produits. Un administrateur de marche peut naviguer dans la base de donnees (16) et assembler une liste de fournisseurs (12) et d'acheteur (10) qui recevront une invitation a intervenir sur un marche public ou prive. Un message diffuse (68) et divers objets de suivis de reponses (78) sont assemblees dans un objet de marche unique. Cet objet de marche unique sert d'organe d'archivage pour toute interaction commerciale en passe de conclure une transaction entre les acheteurs (10) et les fournisseurs (12). Les fournisseurs qui acceptent d'intervenir sur ce marche ont l'autorisation d'attacher tout ou partie des informations relatives a leurs produits a l'objet de marche.

English Abstract

An apparatus and method for selecting a lowest bidding vendor from a plurality of vendors (8) of a customized good or service, including receiving a set of vendor's attributes from each of the plurality of vendors (8) representing their respective capabilities, and receiving an invitation-for-bid data from the buyer (6) defining a custom job for which the buyer (6) desires price quotes or bids. The vendor attributes or the invitation-for-bid, or both, are received through a web browser (10). The invitation-for-bid is compared to each of the vendor's attributes according to certain standard or optional selection criteria to generate a vendor selection pool of vendors (14) qualified to bid on the job. Each vendor in the vendor selection pool receives a vendor's invitation-for-bid. A bid is received from at least one vendor in the vendor selection pool, the lowest price bid is identified, the buyer (6) is informed of the identity of the selected vendor, and solicited for approval of the selected vendor. Upon receipt of approval from the buyer (6), an order is issued to the selected vendor. The non-selected vendors in the selection pool are informed of the bid prices and of the selection results.

French Abstract

La presente invention concerne un appareil et un procede permettant de selectionner le vendeur le mieux disant parmi des vendeurs (8) d'un bien ou d'un service personnalise. Ce procede consiste a recevoir un ensemble de caracteristiques vendeur en provenance de chaque vendeur d'une pluralite de vendeurs (8), qui representent leurs capacites respectives, et a recevoir un appel d'offres en provenance des acheteurs (6) definissant une tache personnalisee pour laquelle l'acheteur souhaite obtenir des propositions de prix ou des devis. Les caracteristiques

English Abstract

A methodology, system and business model are disclosed for facilitating a fully automated buyer's auction (figure 1) in which the major types of transaction costs are significantly reduced by providing the buyer (A100 and A400) and the sellers (A700, A900 and A1100) with near-perfect information about one another, including information about buyer preferences and competing sellers' offers. The system implements a buyer's auction with multidimensional bidding that minimizes market intelligence, search, bargaining and transaction execution costs and thus creates more competitive, frictionless markets. Buyers (A100 and A400) and sellers (A700, A900, A1100) can efficiently conduct the buyer's auction within a unified environment, thereby minimizing buyer integration costs as well. The buyer's auction generates commercially marketable proprietary information and a revenue stream for the auctioneer providing such a service.

French Abstract

L'invention concerne une methodologie, un systeme et un modele commercial destines a faciliter une vente aux encheres (un acheteur, plusieurs vendeurs), entierement automatisee, dans laquelle on a grandement reduit

Search report

les principaux types de couts transactionnels en fournissant a l'acheteur et aux vendeurs des informations presque parfaites les concernant les uns les autres, notamment des informations relatives aux preferences de l'acheteur et aux offres des vendeurs concurrents. Ce systeme implique une vente aux encheres par encheres multidimensionnelles, laquelle permet de minimiser les couts d'informations commerciales, de recherche, de marchandage et d'execution de la transaction, et donc de creer des marches plus competitifs et sans friction entre acheteurs et vendeurs. Des acheteurs et vendeurs peuvent mener de facon efficace la vente aux encheres dans un environnement unifie, ce qui minimise ainsi egalement les couts d'integration acheteur. Cette vente aux encheres (un acheteur, plusieurs vendeurs) produit des informations specialisees exploitables commercialement, ainsi qu'un courant de recettes pour le commissaire-priseur/societe de ventes aux encheres offrant un tel service.

English Abstract

An internet-based commerce system (100) simultaneously usable by multiple purchasing organizations (112) and multiple vendors (114) while controlled by a virtual single server and database is disclosed. The commerce system handles the requisitions for goods and services by system users within an purchasing organization and directs requisitions to other users for approval within that purchasing organization using approval routes electronically established within the database. Requisitions are electronically processed into Requests for Quotation (**RFQ**), Requests for Information (RFI) or Requests for **Bid** (**RFB**) that are then released to the **internet** for **electronic** responses by users representing vendors who access the system. Vendors with profiles matching the requests are notified preferably through response-prompting e-mail. Using the system, **buyer** users for **purchasing** organizations **process** electronic responses into awards. The system then notifies the awardees and other vendors.

French Abstract

L'invention concerne un systeme de commerce via Internet (100) pouvant etre simultanement utilise par de multiples organisations d'achat (112) et de multiples vendeurs (114) et commande par un seul serveur virtuel et une base de donnees associee. Ce systeme de commerce gere les commandes de biens et services effectuees par les utilisateurs du systeme au sein d'une organisation d'achat et adresse ces commandes a d'autres utilisateurs au sein de cette organisation d'achat en vue d'une approbation via des methodes d'approbation electroniques etablies dans la base de donnees. Ces commandes sont traitees par voie electronique et transformees en demandes de prix (DP), en demandes d'informations (DI) ou en demandes d'offres (DO) qui sont ensuite accessibles sur Internet afin que les utilisateurs representant les vendeurs repondent par message electronique. Les vendeurs, dont les profils correspondent aux demandes, sont avertis de preference par courrier electronique les invitant a

English Abstract

A system for warranting the identity of a party over an electronic network is comprised of a root entity (102) and a plurality of additional entities (104, 106, 108 and 110). Each additional entity (104, 106, 108 and 110) is admitted to the system after agreeing to abide by a plurality of operating rules promulgated by the root entity (102). The additional entities (104, 106, 108 and 110) may comprise level-one participants and level-two participants. Certificate authorities maintained by level-one participants issue digital certificates that bind the customers to their public keys. System customers are also provided with a warranty request formatter which is adapted to formulate a request for a warranty as to the veracity of information contained in a digital certificate. The warranty request formatter is also adapted to transmit the request for the warranty to the customer's level-one participant. The level-one participants maintain an intelligent messaging gateway which is adapted to receive messages from their customers and to transmit messages to appropriate system entities. Warranty offers are issued by the participant that issued the digital certificate identified in the warranty request. The participants are required to maintain collateral with a collateral custodian.

French Abstract

La presente invention concerne un systeme permettant de garantir l'identite d'un interlocuteur relie par un reseau electronique. Ce systeme se compose d'une entite racine (102) et d'une pluralite d'entites additionnelles (104, 106, 108 et 110). Chaque entite additionnelle (104, 106, 108 et 110) est autorisee dans le systeme apres avoir accepte de respecter un certain nombre de regles de fonctionnement edictees par l'entite racine (102). Les entites additionnelles (104, 106, 108 et 110) sont generalement constituees de participants de niveau un et de participants de niveau deux. Les autorites de certification, qui sont assurees par les participants de niveau un, emettent des certificats numeriques qui lient les clients a leurs cles publiques. Les clients systeme sont egalement pourvus d'un formateur de demande de garantie qui est adapte a la formulation d'une demande de garantie quant a la veracite de l'information contenue dans le certificat numerique. Le formateur de demande de garantie est egalement adapte a l'emission de demande de garantie se rapportant au participant de niveau un du client. Les participants de niveau un font vivre une passerelle de messagerie intelligente qui est concue pour recevoir des messages de leurs clients et emettre des messages a destination d'entites systeme appropriees. Des offres de garantie sont emises par le participant qui a emis le certificat numerique identifie dans la demande de garantie. On demande aux participants de conserver une relation de collateralite avec un messenger collateral.

English Abstract

Disclosed is a system for warranting the identity of a party over an electronic network. The system comprises a root entity (104) and a plurality of additional entities (106, 108, 110). Each additional entity is admitted to the system after agreeing to abide by a plurality of operating rules promulgated by the root entity. The additional entities may comprise level-one participants (106) and level-two participants (110). Certificate authorities maintained by the level-one participants issue digital certificates to their customers. The certificates bind the customers to their public keys. System customers are also provided with a warranty request formatter which is adapted to formulate a request for a warranty as to the veracity of information contained in a digital certificate. Warranty offers are issued by the participant that issued

English Abstract

The invention satisfies these needs by providing a method and device for tokenless authorization of an electronic payment between a payor and a payee using an electronic third party identicator and at least one payor bid biometric sample. The method comprises a payor registration step, wherein the payor registers with an electronic third party identicator at least one registration biometric sample, and at least one payor credit/debit account. The payee registers a payee identification data with the electronic third party identicator. An electronic financial transaction is formed between the payor and the payee, comprising payee bid identification data, a transaction amount, and at least one payor bid biometric sample, wherein the bid biometric sample is obtained from the payor's person, in a transaction formation step. The payee bid identification data, the transaction amount, and payor bid biometric sample are electronically forwarded to the third party electronic identicator. A comparator engine compares the bid biometric sample with at least one registered biometric sample for producing either a successful or failed identification of the payor. The comparator engine also compares the payee's bid identification data with a payee's registered identification data for producing either a successful or failed identification of the payee. Once the device successfully identifies the payor and payee, a biometric-based authorization of an electronic payment is issued without the payor presenting any personalized man-made tokens to transfer funds from the payor's financial credit/debit account to the payee's financial account.

French Abstract

L'invention concerne un procede et un dispositif pour autoriser un paiement electronique sans jeton, entre un debiteur et un beneficiaire, a l'aide d'un identificateur electronique de tiers et d'au moins un echantillon biometrique du debiteur. Ce procede comprend une etape d'enregistrement du debiteur, selon laquelle le debiteur est enregistre a l'aide d'un identificateur electronique de tiers avec au moins un echantillon biometrique d'enregistrement et au moins un compte credit/debit de debiteur. Le beneficiaire est enregistre sous forme de donnees d'identification de beneficiaire avec l'identificateur de tiers electronique. Une transaction financiere electronique est etablie entre le debiteur et le beneficiaire, comprenant des donnees d'identification de beneficiaire, un montant de transaction, et au moins un echantillon biometrique du debiteur, cet echantillon etant obtenu du debiteur lui-meme au cours d'une etape de formation de transation. Les donnees d'identification du beneficiaire, le montant de la transaction, et l'echantillon biometrique du debiteur sont envoyes par voie electronique a l'identificateur electronique de tiers. Un moteur de comparateur

Search report

compare l'echantillon biometrique avec au moins un echantillon biometrique enregistre pour produire une identification satisfaisante ou non du debiteur. Le moteur de comparateur compare egalement les donnees d'identification du beneficiaire avec les donnees d'identification enregistrees du beneficiaire pour produire une identification satisfaisante ou non du beneficiaire. Lorsque le dispositif a identifie de maniere satisfaisante le debiteur et le beneficiaire, une autorisation de paiement electronique, fondee sur la biometrie, est emise sans que le debiteur n'aie a presenter de jetons personnalises pour transferer des fonds du compte de debit/credit du debiteur au compte financier du beneficiaire.

English Abstract

A system and technique which aggregates demand for products or/and services on a real time basis. Individual buyers are aggregated into temporary groups (36, 37). The members of a group can purchase at a volume price. The price paid is based on the number of members in the group. This is done without the members of each temporary group having any interaction with each other and without the members of each temporary group knowing anything about the other members of the temporary group. The price at which products are sold is based upon the number of individuals that have joined each particular group before the buy cycle closes (38).

French Abstract

La presente invention concerne un systeme et une technique de groupement de demandes de produits et/ou de services sur une base de temps reelle. Les acheteurs individuels sont regroupes dans des groupes provisoires (36, 37). Les membres d'un groupe peuvent acheter a un prix qui depend du volume de la demande. Le prix paye depend du nombre de membres du groupe. Selon ce systeme, les membres de chaque groupe provisoire n'etablissent aucun contact entre eux et ne savent rien des autres membres du groupe. Le prix auquel sont vendus les produits depend du nombre d'individus ayant rejoint chaque groupe particulier avant la fermeture du cycle d'achat (38).

English Abstract

An apparatus and method for selecting a lowest bidding vendor from a plurality of vendors of a customized good or service, including receiving a set of vendor's attributes from each of the plurality of vendors (8) representing their respective capabilities, and receiving an invitation-for-bid data from the buyer (6) defining a custom job for which the buyer desires price quotes or bids. The vendor attributes or the invitation-for-bid, or both, are received through a web browser (10). The invitation-for-bid is compared to each of the vendor's attributes according to certain standard or optional selection criteria to generate a vendor selection pool (14) of vendors qualified to bid on the job. Each vendor in the vendor selection pool (14) receives a vendor's invitation-for-bid (16). Upon bid approval by buyer, an order is issued to the selected vendor.

French Abstract

La presente invention concerne un appareil et un procede de selection du fournisseur le moins cher parmi une pluralite de fournisseurs d'un article ou d'un service personnalise, consistant a recevoir un ensemble d'attributs de fournisseur representant les capacites respectives de chacun des fournisseurs parmi la pluralite de fournisseurs, et a recevoir de l'acheteur (6) des donnees d'invitation a emettre des offres definissant un travail personnalise pour lequel l'acheteur desire des prix ou des offres. Les attributs du fournisseur ou l'invitation a emettre des offres, ou les deux, sont recus via un explorateur Web (10).

Search report

L'invitation a emettre des offres est comparee a chacun des ensembles d'attributs de fournisseur en fonction de certains criteres standards ou de selection facultative pour generer un groupe de selection de fournisseurs (14) comprenant les fournisseurs qualifies pour emettre des offres relatives au le travail en question. Chaque fournisseur appartenant au groupe de selection de fournisseurs (14) recoit une invitation de fournisseur a emettre des offres (16). Des que l'acheteur accepte l'offre, un ordre est emis pour le fournisseur selectionne.

English Abstract

A projected management server coupled with a computer network, such as the Internet. In one embodiment a spec server is also incorporated into the project management environment for completing specs, generating requests for price quotations, purchase orders and the like. A project tree represents project management objects. Project management objects can be of any type. Object types are defined for each particular implementation of the system. Typical examples of project management object types include organizational entities, work-groups, people, projects, budgets, tasks, costs, timesheets, specs, requisitions, purchase orders, to-do lists etc. The objects are organized in a hierarchical data structure referred to as a project management tree or project tree. Each object in the project tree comprises a number of methods that describe the way the object behaves. Such methods include

for example, methods that describe the way the object is added to the tree, edited, deleted from the tree, and archived. An infinite class of objects are supported so that systems can be customized for any type of environment. In a typical embodiment a key user sets-up the initial environment for the project management system including setting up the structure of the enterprise, defining users, specifying user-groups, user access rights, passwords, etc. Once the initial system is set-up, users log-in to the project management system from locations within or outside of the enterprises. The system determines the identity of the user, and based on the identity and user access rights, presents the user with a particular view of the project management tree customized for the user. The user can then navigate through sections of the project tree for which the user is authorized. Users can interact with the project management system by performing functions on that portion of the project tree in which they are authorized to perform functions. Functions include adding, editing deleting and archiving project management objects. Users from multiple organizational work-groups participate using the project management system in a collaborative fashion. Specs are generated, suppliers are matched with specs, RFQs are sent to suppliers, suppliers bid on jobs, jobs are awarded by buyers and purchase orders are generated.

French Abstract

L'invention concerne un projet de gestionnaire couple a un reseau informatique, tel qu'Internet. Dans un mode de realisation, l'environnement de la gestion de projet comprend egalement un serveur spec pour completer des specifications, etablir des demandes de prix, effectuer des ordres d'achat, etc. Un projet d'arborescence represente des objets de gestion de projet, lesquels peuvent etre de toute sorte. Les types d'objets sont definis pour chaque implantation particuliere du systeme. Des entites organisationnelles, groupes de travail, individus, projets, budgets, taches, couts, feuilles de temps, specifications, requisitions, ordres d'achat, listes "a faire", etc., sont notamment des exemples caracteristiques de types d'objets de gestion de projet. Les objets sont organises en structure hierarchique de donnees, dite arborescence de gestion de projet ou arborescence de projet. Dans chaque arborescence de projet, chaque objet renferme plusieurs procedes qui decrivent le comportement dudit objet. Ces procedes comprennent, par exemple, des procedes qui decrivent comment ajouter l'objet a l'arborescence, le reviser et le supprimer de l'arborescence et l'archiver. Une classe infinie d'objets est documentee, ce qui permet de personnaliser les systemes, quel que soit le type d'environnement. Dans un mode de realisation type, l'utilisateur principal configure l'environnement initial du systeme de gestion de projet comprenant la mise en place de la structure de l'entreprise, la definition des utilisateurs, la specification des groupes d'utilisateurs, les droits d'acces des utilisateurs, les mots de passe, etc. Une fois le systeme initial configure, les utilisateurs se connectent au systeme de gestion de projet, qu'ils soient a l'interieur ou a l'exterieur de l'entreprise. Le systeme determine l'identite de l'utilisateur et, sur la base de son identite et de ses droits d'acces, lui presente une vue particuliere de l'arborescence de gestion de projet personnalisee qui lui est destinee. L'utilisateur peut alors naviguer a travers les sections de l'arborescence de projet auxquelles il a droit. Il peut interagir avec le systeme de gestion de projet en executant des fonctions sur la partie de l'arborescence de projet dans laquelle il est autorise a executer des fonctions, lesquelles sont notamment l'adjonction, la revision, la suppression et l'archivage d'objets de gestion de projet. Les utilisateurs de plusieurs groupes de travail organisationnels participent en utilisant, en collaboration, le systeme de gestion de projet. Des specifications sont creees, les fournisseurs sont compares aux dites specifications, des demandes de prix (Dprix) sont envoyees aux

English Abstract

A system and method for managing access to a document by a plurality of end users is disclosed. The system and method includes storing the

Search report

document in a memory of a server. According to a disclosed method, steps include transmitting a first copy of the document to a computer of a first user and transmitting a second copy of the document to a computer of a second user. In addition, receiving a modified first copy of the document from the computer of the first user and storing the modified first copy of the document in the memory under a first document name. And further, receiving a modified second copy of the document from the computer of the second user and storing the modified second copy of the document in the memory under a second document name. And still further, storing data identifying the modified first copy of the document and data identifying the modified second copy of the document in the memory.

French Abstract

Cette invention concerne un systeme et un procede qui permettent de gerer l'accès de plusieurs utilisateurs en fin de ligne a un document. Ce systeme et ce procede consistent a enregistrer le document dans la memoire d'un serveur. Un procede, qui comprend plusieurs etapes, consiste tout d'abord a transmettre un premier exemplaire de ce document a l'ordinateur d'un premier utilisateur; puis a transmettre un second exemplaire de ce document a l'ordinateur d'un second utilisateur. On recoit ensuite un premier exemplaire modifie du document provenant de l'ordinateur du premier utilisateur, et l'on enregistre ce premier exemplaire modifie du document dans la memoire sous un premier nom de document. On recoit egalement un second exemplaire modifie du document provenant de l'ordinateur du second utilisateur, et l'on enregistre ce second exemplaire modifie du document dans la memoire sous un second nom de document. Au cours d'une derniere etape, on enregistre dans la memoire les donnees permettant d'identifier le premier exemplaire modifie du document, ainsi que les donnees permettant d'identifier le second exemplaire modifie du document.

CONSUMERS LIKE ITEM-PRICING, BUT IT'S A BIG HEADACHE FOR RETAILERS

Detroit Free Press (FP) - Sunday, August 24, 1997

Edition: WEB EDITION Section: NWS

Word Count: 767

And so some communities are fighting back by strictly enforcing laws that require retailers to **label** every **item** with a price tag. "We don't expect stores to label every nut and bolt...

... the register." Years ago, everything had a price tag. From hosiery to hair spray, stores **labeled** all **merchandise**, whether it cost 99 cents or \$199. But the need for price tags faded as retailers turned to high-tech systems, which require less manpower and **process** **purchases** more quickly. The first electronic scanner was installed in 1974 in Troy, Ohio, and now...

... to complain that out-of-order shelf labels made it difficult to locate prices and **electronic** scanners misread UPCs. A Federal **Trade** Commission study last year of 17,000 items at 294 stores found 4.82 percent...

...item or face substantial penalties. In Westchester County, fines can run retailers \$100 for every **item** not **labeled**. Michigan has one of the nation's toughest pricing laws. Enacted in 1976, retailers must...

DELL: Dell and the Internet go from strength to strength

M2 PRESSWIRE

July 07, 1998

JOURNAL CODE: WMPR LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 699

-- Customers eschew traditional purchase model in favour of Dell's comprehensive online sales and support service

Statistics released from Dell illustrate the company's success in drawing customers to its Internet store. Launched one year ago, www.dell.com/uk has grown and matured to the extent that it now attracts nearly 1/4 million visitors each month. Of those that visit Dell's store, there is a 50% higher propensity to purchase than would otherwise be the case, with 60% of overall buyers being second time purchasers.

The volume of people visiting Dell's Internet store continues to rise, to the extent that visits are now exceeding the number of calls to its call centre. In comparison, the US store has a 10:1 ratio of visits to calls, strongly suggesting a similar uptake in the UK despite the store opening just 12 months ago.

Dell's call centre operation has also experienced significantly higher closure rates as many customers 'sell themselves' on their tailored system while visiting the Dell store. Advantageous pricing and special offers for web visitors continue to fuel the migration of users to the web site which promises Dell instant scalability in business growth; any escalation in sales capacity can be immediately accommodated by the web site, eliminating any threat of resource gaps through burgeoning sales.

The first year has also seen the rapid acceptance of Dell's online service by the corporate sector.

Introduced into the UK just nine months ago, Dell's Premier Page programme now has over 150 pages installed. Premier Pages are personalised Internet pages, created in collaboration with those companies with an ongoing relationship with Dell. Around five new pages are currently being set up a week and each allows those businesses to purchase equipment, track orders, view management reports on their Dell business, view their purchase history and access all key Dell contact details on custom web pages from the convenience of their PC.

The European market has also reacted favourably to Dell's Internet business strategy, with sales reaching \$7 million per week. Although generally acknowledged to be twelve to fifteen months behind the US in terms of acceptance of the Internet, Dell has found that its European customers are twice as likely to buy a computer from the web site than their American counterparts. Compared with the introduction of Dell's US Internet store, the sales trend shows the European market to be between nine and twelve months behind America when tracking the take-up profile of Internet business.

The winner of PC Direct's Best Web Site award last year, the success of the interactive product 'Configurator', the introduction of the automatic phone service 'Call Me Back', and, most recently, the opening of a new store are just a few of the highlights in a period that saw Dell's store attract 10,000 visits on average per day, up from 5,000 just three months ago.

Worldwide, Dell's Internet strategy is helping drive the company's year-over-year revenue growth of more than 40 percent in each quarter. The company's worldwide web site receives 1.5 million hits per week with around 20% entering the Dell store. It has set up 42 country specific sites serving 35 countries in 12 languages. A comprehensive pre- and post-sales support programme is supplemented by 45,000 technical pages, used by 100,000 customers each week.

With worldwide sales of \$5 million per day from the web site, and as the leading direct computer systems company, Chairman Michael Dell predicts that the company will be conducting 50% of its business via the Internet by 2000.

About Dell Computer Corporation Ranked No. 125 in the Fortune 500

companies, Dell Computer Corporation is the world's leading direct computer systems company, based on revenues of \$13.6 billion for the past four quarters. Dell designs and customises products and services to end-user requirements, and offers an extensive selection of peripherals and software through the DellWare program. Information on Dell and its products can be obtained through the UK press office on 01344 723045 or by accessing the Dell World Wide Web server at www.dell.com/uk.

(USE FORMAT 7 FOR FULLTEXT)

MICROSOFT HOW VULNERABLE?: It's faltering in court. Its crucial Win2000 system is two years late. And its rivals are ready

By Steve Hamm in Redmond, Wash., with Marcia Stepanek in New York and Peter Burrows and Andy Reinhardt in San Mateo, Calif.

Competitors Cash in While Microsoft Struggles

IBM Operating systems are slow-growth businesses for IBM. But its

middleware software is taking off. These programs run on IBM's mainframes, AS400 midrange machines, and Unix servers. Last year, middleware sales increases ranged from 70% to 90%.

CHAIRMAN LOUIS V. GERSTNER

SUN is taking some wind out of Microsoft's sails with Java, its software used to write applications that will run on any computer--not just Windows-based machines. And, thanks to the shift toward Internet computing, Sun's powerful servers are in great demand for Web sites and E-commerce.

CEO SCOTT MCNEALY

HEWLETT-PACKARD After years of following Microsoft's siren song, HP is hearing a second tune. It has announced a server that just runs Oracle's database software--no Windows necessary--and will unveil at least three 'server appliances' in coming months. These are low-cost machines devoted to a single task that oftentimes don't need Windows.

CHAIRMAN LEWIS E. PLATT

LINUX The freeware operating system seems to be on a roll--and competing with Microsoft. International Data Corp. pegs Linux' market share at 17.2% last year, about half that for Microsoft's rival Windows NT server. Although it's still no barnburner in corporations, it's starting to win a few converts. Example: Southwestern Bell's network monitoring center in Kansas City.

LINUS TORVALDS

ORACLE His network-computer gambit was a flop. Now Chairman Larry Ellison is taking another stab at Microsoft with the database appliance. It's an Oracle database running on a PC server--no Windows required. This time, Oracle has a powerful partner: Hewlett-Packard.

CEO LARRY ELLISON

NOVELL Once the leading maker of networking software for corporate servers, Novell's share of new sales was eclipsed by Windows NT in 1996. But Novell's NetWare software isn't going away. Novell enjoys key advantages today that Microsoft can't match, especially the ability to centrally manage all the resources of a corporate network.

CHAIRMAN ERIC SCHMIDT

3COM/PALM COMPUTING The fastest-growing segment of the computer business today is tiny handheld devices. The undisputed king is the Palm from 3Com, which grabbed 40% of the market in 1998--compared with 25% for rivals using Microsoft's Windows CE operating system. To stay ahead, 3Com is adding to its product line and working with thousands of software developers.

CHAIRMAN ERIC A. BENHAMOU

DELL & COMPAQ The giant PC makers remain committed to selling Windows-based machines, but both have broken rank of late to also offer servers running rival Linux. Moreover, Compaq is considering selling the Oracle database server appliance.

CHAIRMEN DELL AND PFEIFFER

**Millennium Survey Reveals the Internet is Vital for Promotional Product
Research, Says PromoMart**

PR NEWSWIRE

August 13, 1999

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT
WORD COUNT: 464

LANGHORNE, Pa., Aug. 13 /PRNewswire/ -- With the 20th Century rapidly speeding to a close, millions of people are looking to capitalize on the hysteria surrounding the dawn of the next millennium. Promotions, which focus on this historical event, are among the most effective ways to leave a company's impression on clients, employees or the general public.

PromoMart ([www. promomart . com](http://www.promomart.com)), a cyberstore featuring over 70,000 promotional products, can help companies locate the products, which are right, for their millennium- based promotion.

PromoMart examined the millennium promotion plans of 344 end-users nationwide during a recent survey and discovered that, the internet has become a vital medium for researching and purchasing promotional products. Over 60% of the respondents intended to use the internet to research available products. Additionally, two-thirds of that group said that they also planned to purchase their promotional products online.

Far and away, time oriented products, such as calendars, clocks and countdown clocks will be the most popular items used in upcoming Millennium- based promotions. Over 43% of the survey's respondents stated that they planned to use one of these products in their upcoming promotion. T-shirts were the next most popular item, with 14% of those responding listing that as a key product.

A wide variety of Millennium-based themes are serving as the center of these promotions. Partying, like its 1999, turned out to be the most popular idea, with a New Year's Celebration highlighting most promotional plans. Additionally, software promotions, centering around Y2K compliance, were also highly popular. Other top themes looked to capitalize on the nostalgia craze, futuristic/space age promotions and Year-end Countdown tie-ins. Most of these themes were designed to target either clients (34%) or the general public (23%).

The **PromoMart** survey also discovered that the promotion budgets of companies and Millennium Promotions, in general, will come in all shapes and sizes. While just over 21% of those polled said that they had less than \$100 to spend on their promotion, over 44% were planning to spend between \$100 and \$2,000, while close to 11% intended to spend \$2,000 and up.

Companies, who are seeking to streamline their millennium promotions, can obtain access to over 70,000 promotional products, as well as the complete results of this survey at **PromoMart** ([www. promomart . com](http://www.promomart.com)).

PromoMart has thousands of products, which are specifically designed to target millennium- based promotional plans, such as calendars, clocks, t-shirts, and phone cards. These products and many more can be found by typing the keyword "millennium" into **PromoMart**'s promotional product search.

PromoMart is designed and maintained by ASInternet, a division of the Advertising Specialty Institute, the information center of the promotional products industry.
